OUR STORY

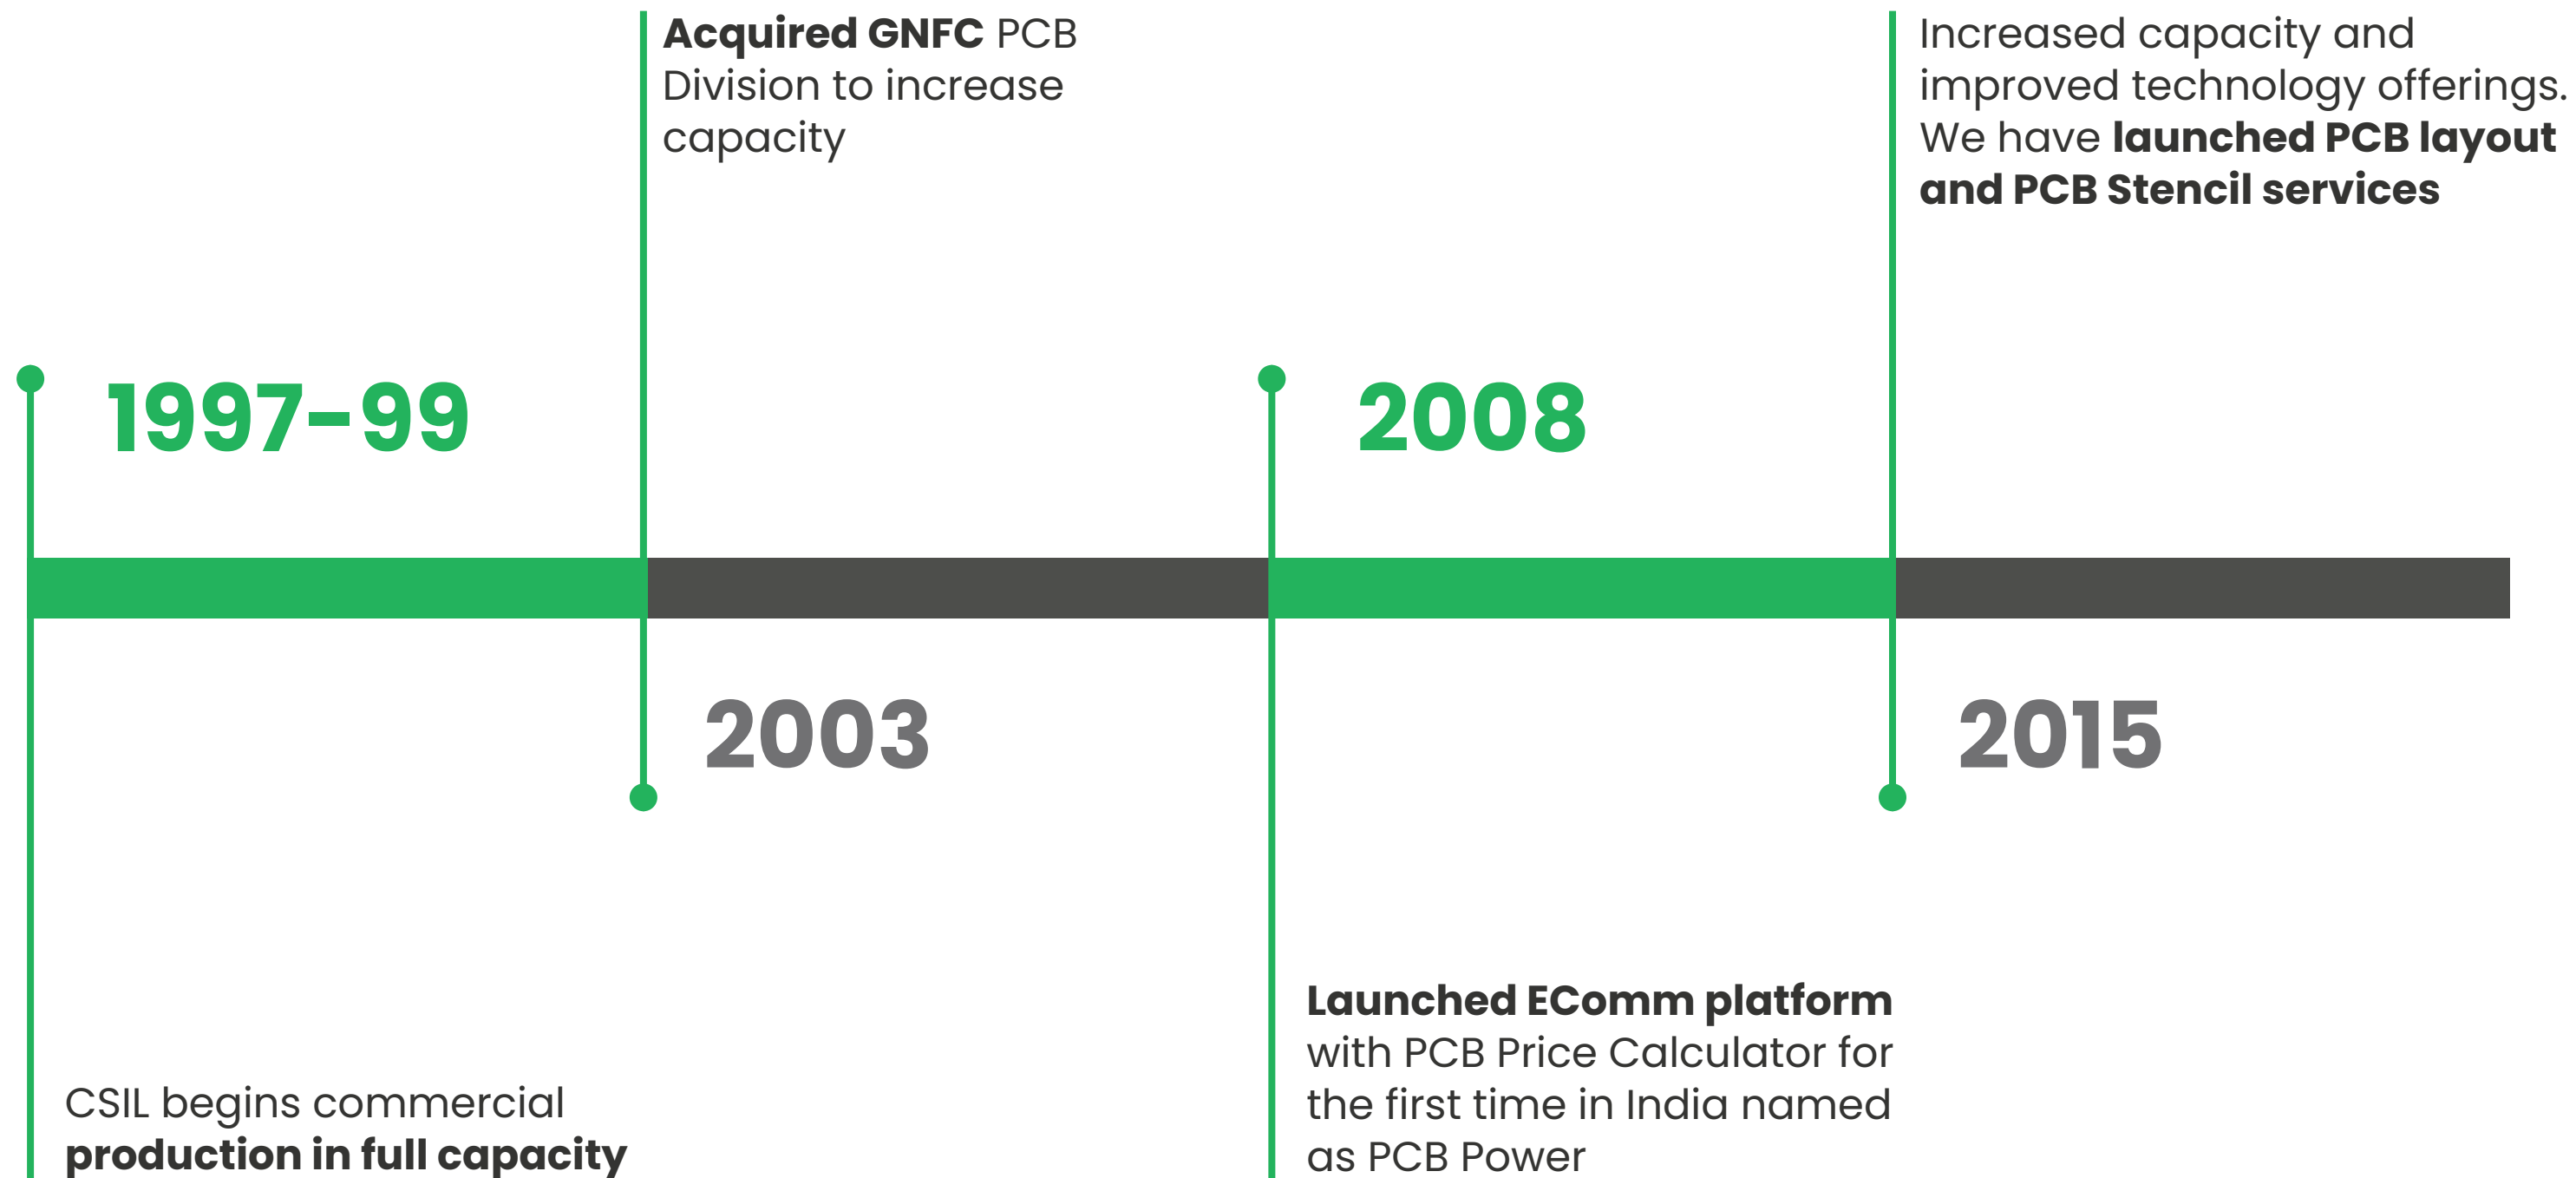

We measure the value we have created, by the degree of efficiency and effectiveness our customers attain with our services.

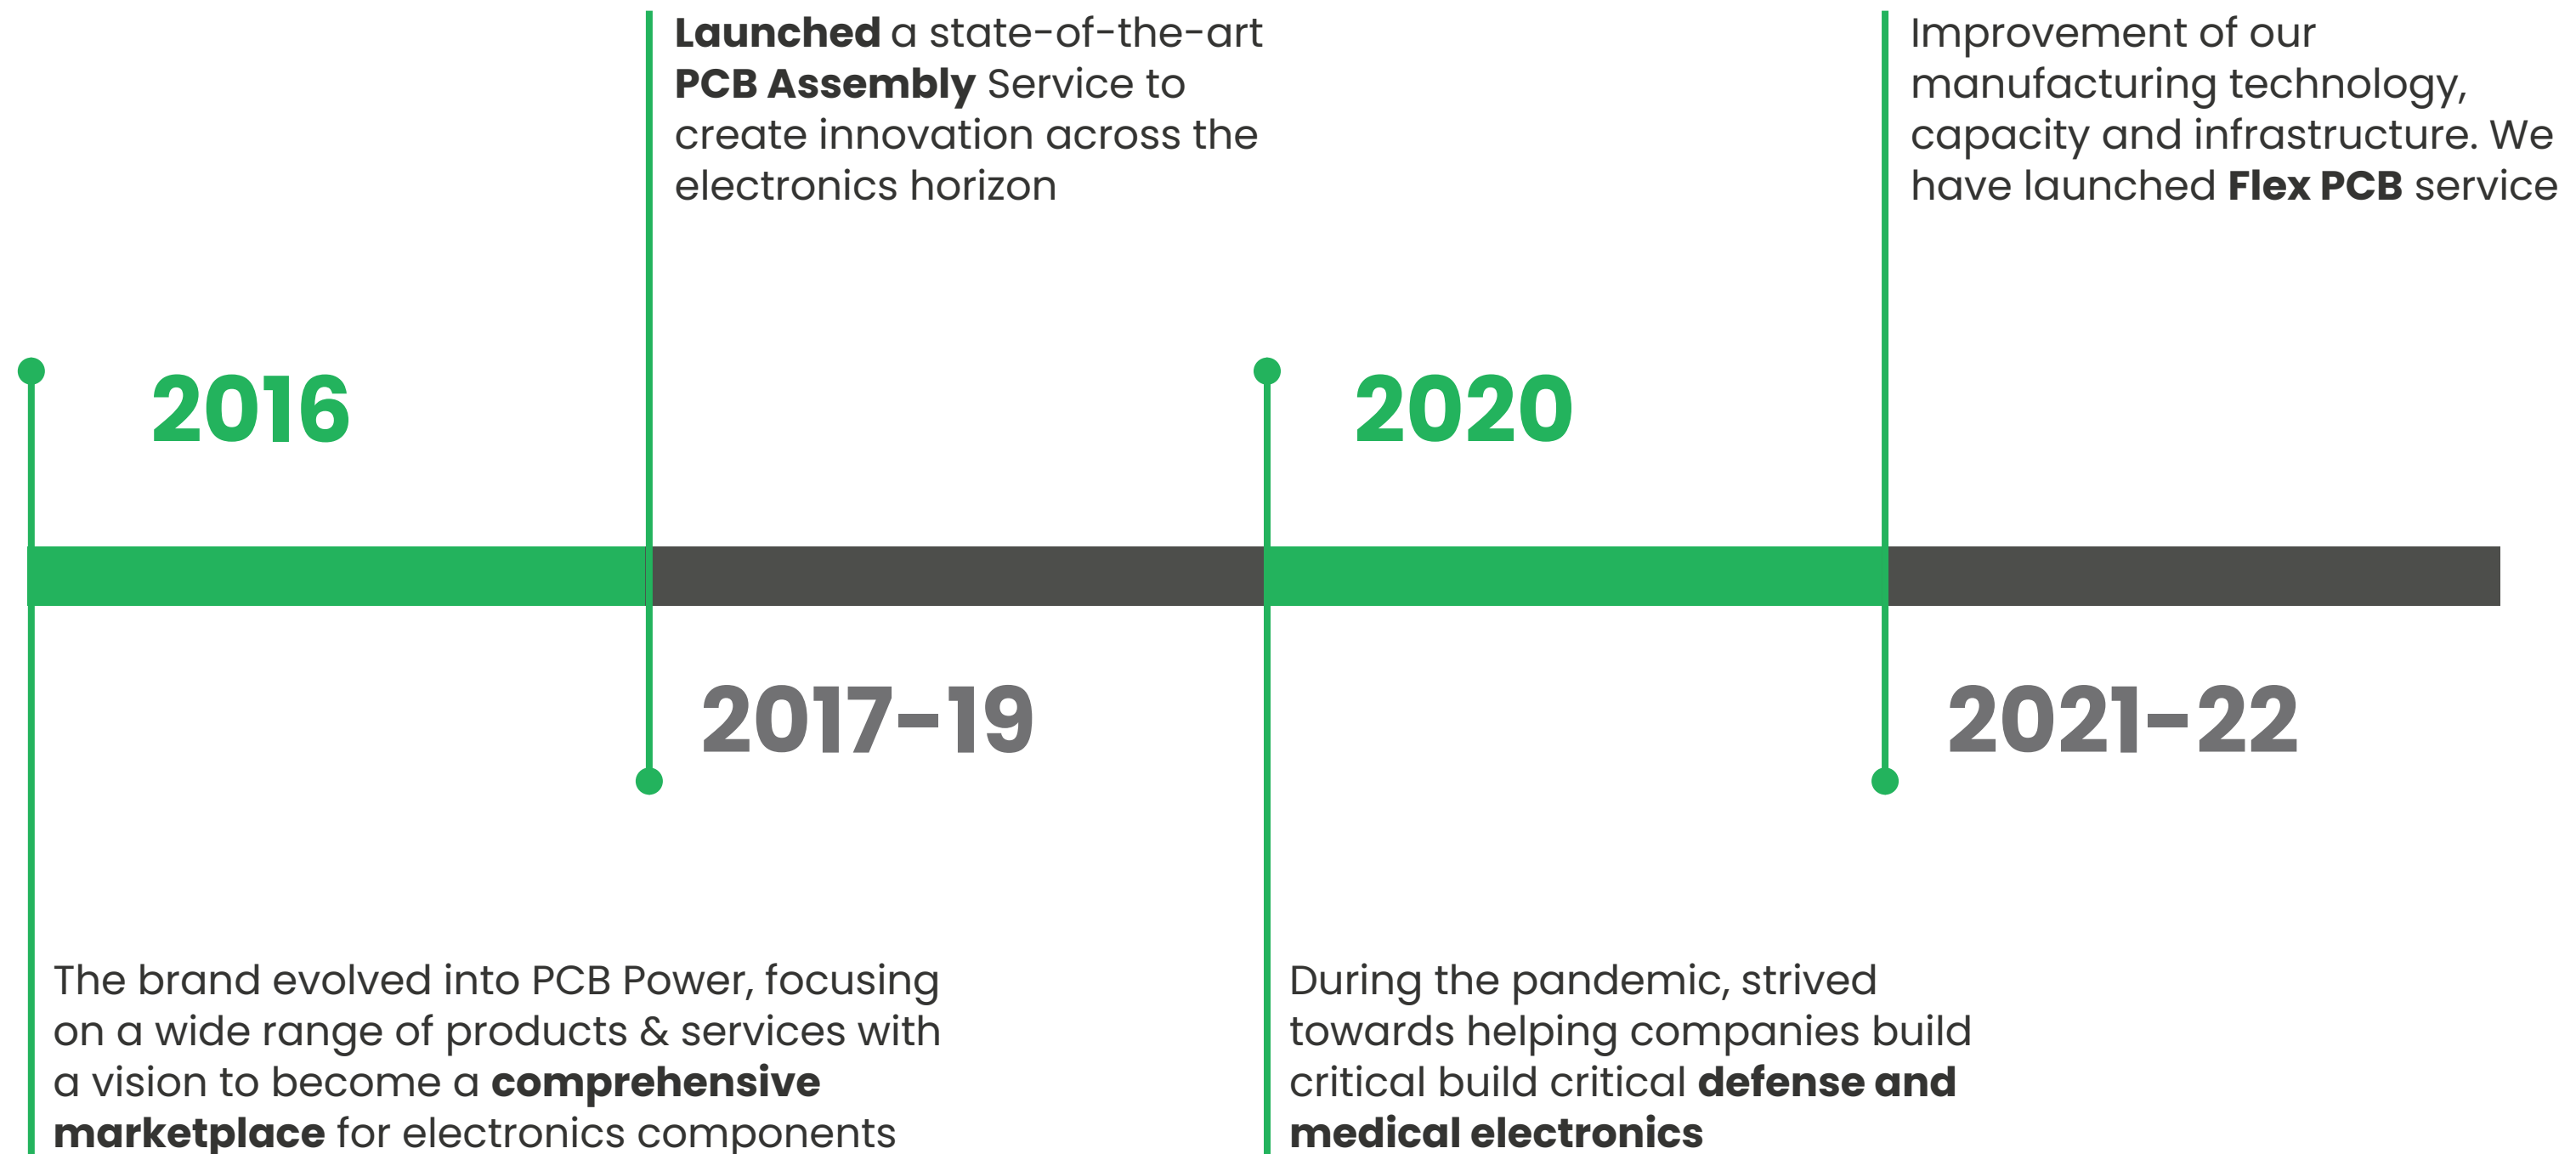

250+ CITIES

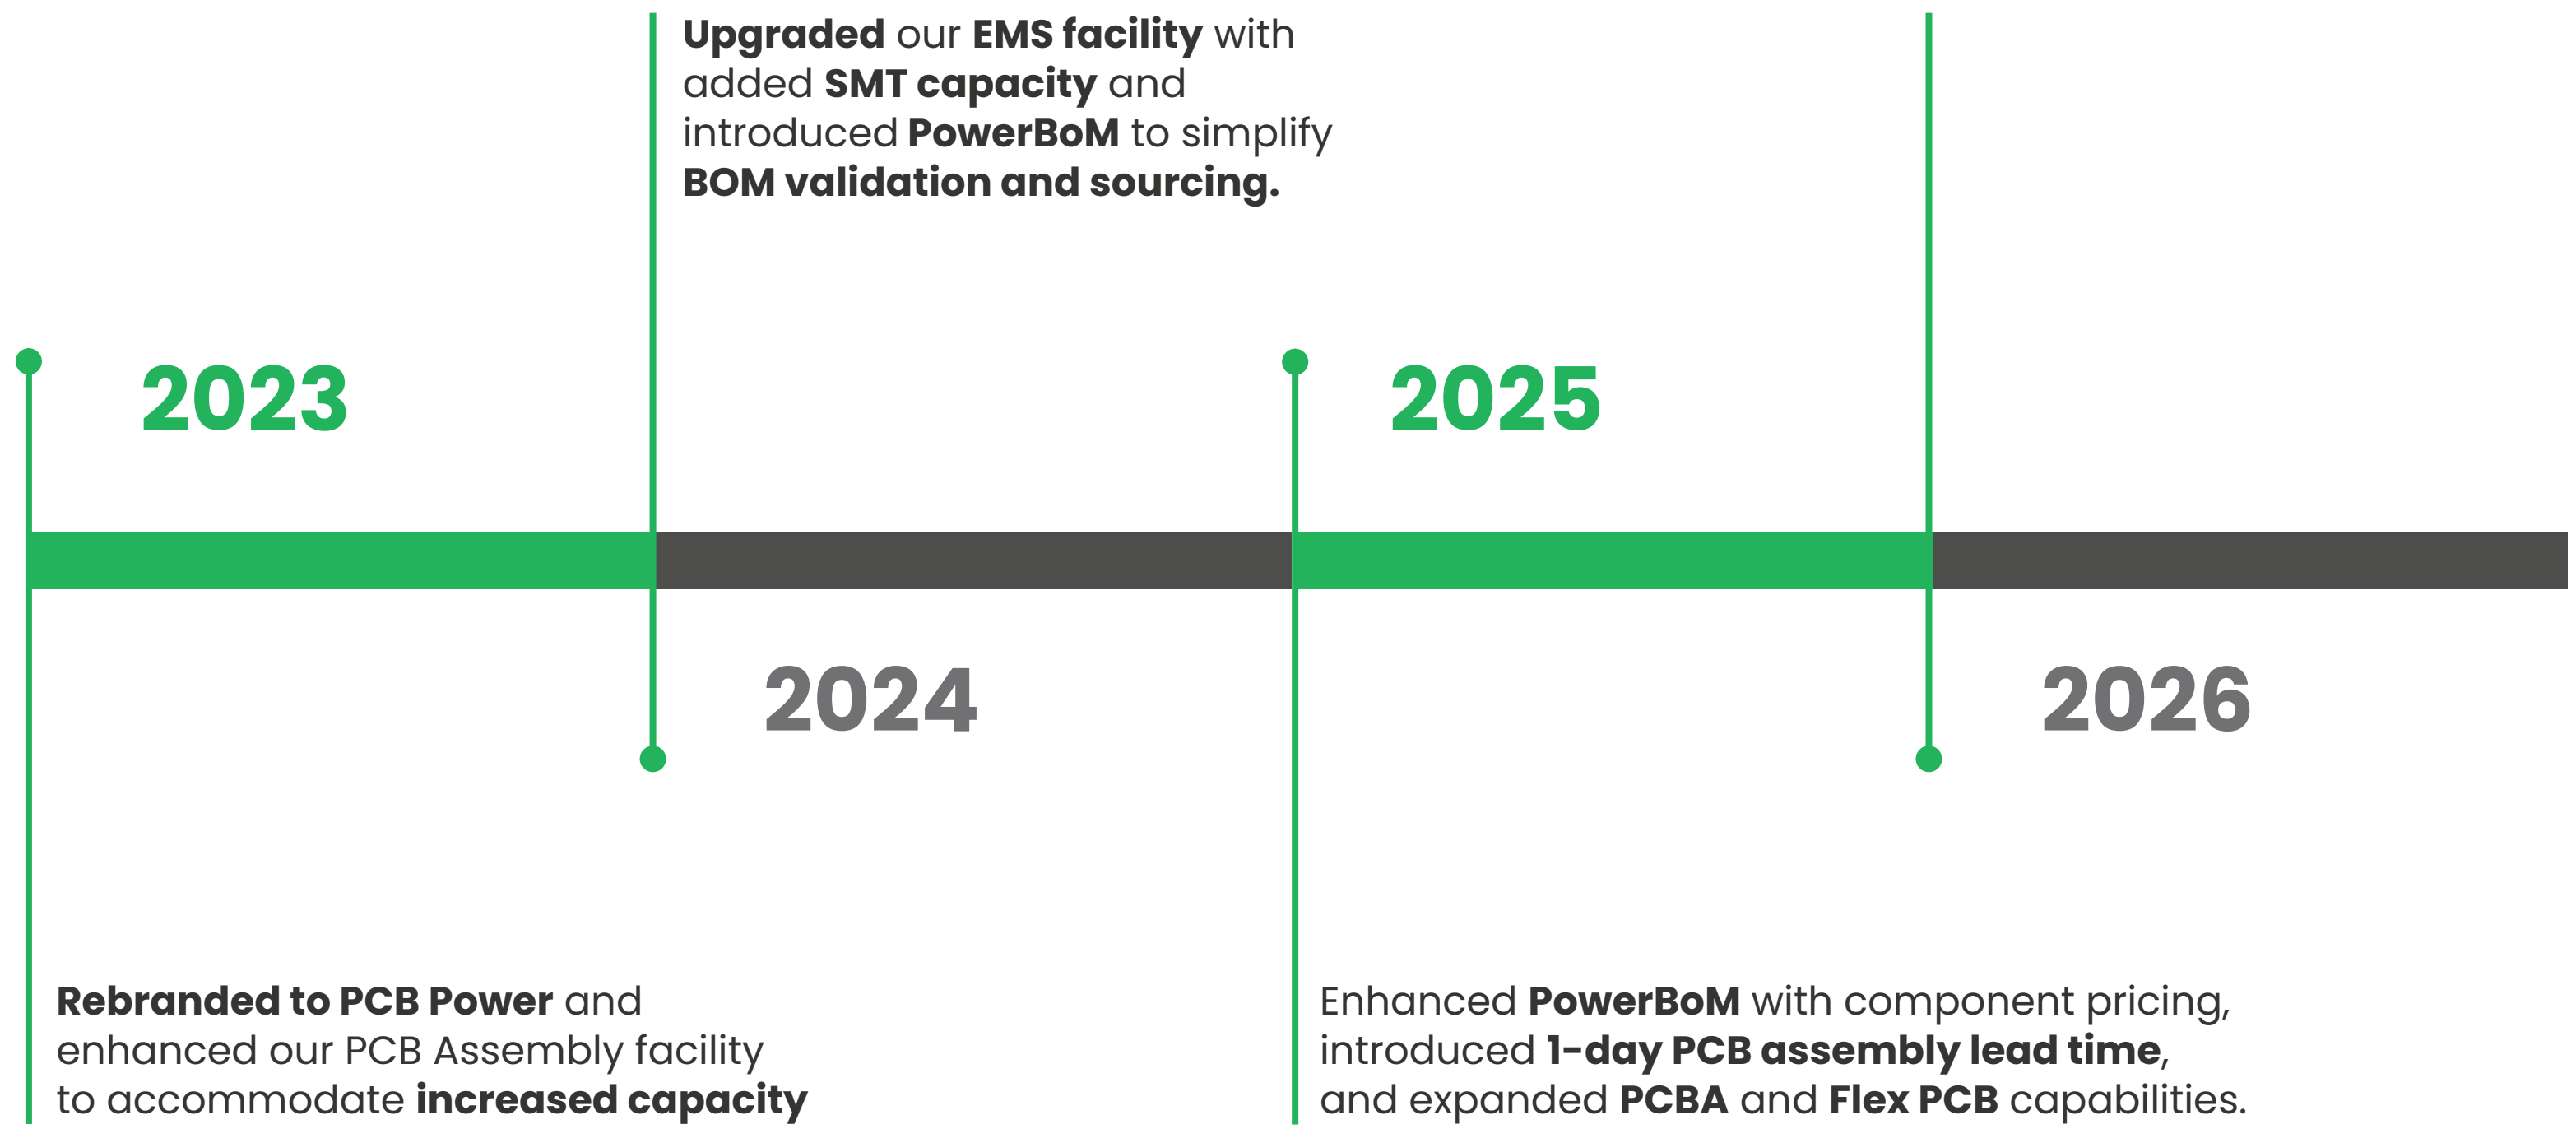

15+ INDUSTRIES CATERED

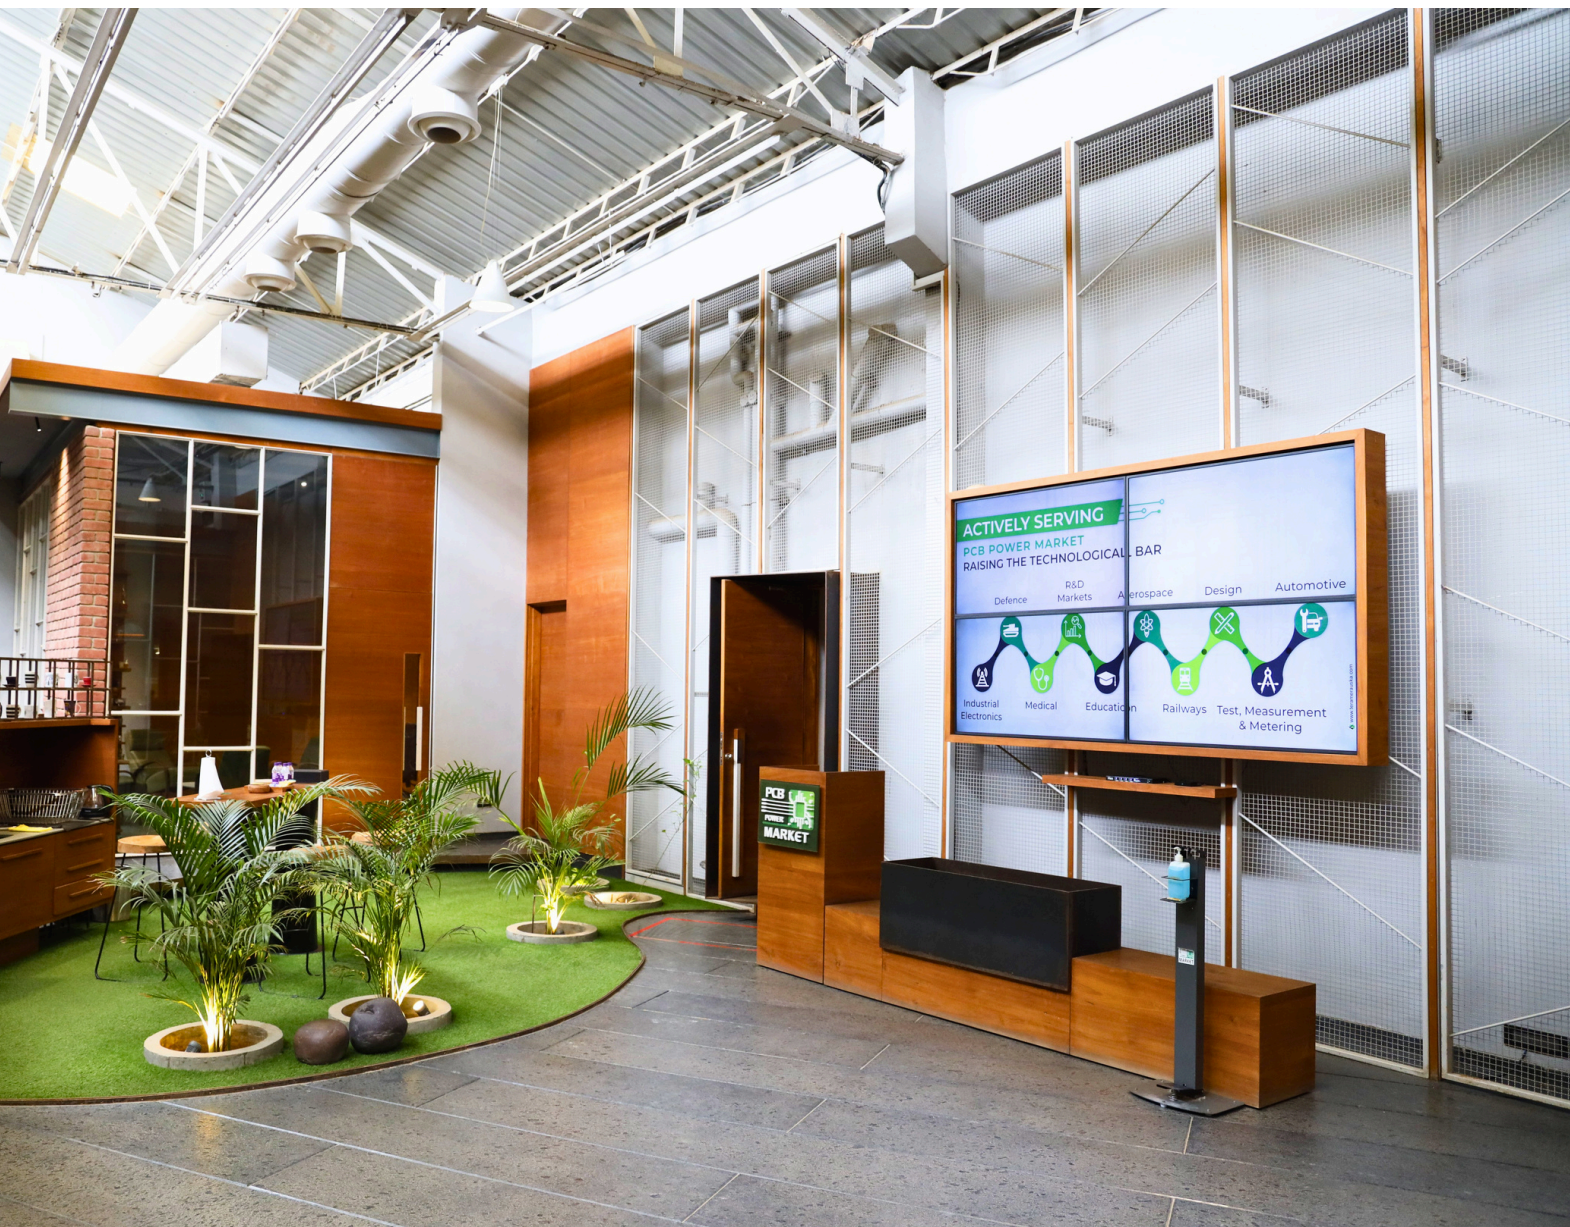

5000+ SATISFIED CUSTOMERS

Our Drive and Direction

To become the integrated electronics, design and manufacturing partner of all innovative electronics manufacturing companies.

To empower innovators in the electronics industry by becoming the foundation of their products and services.

Customer at the Centre of Everything.

Ethics, Transparency and Honesty in All Our Dealings.

Excellence Driven Action Over Everything Else.

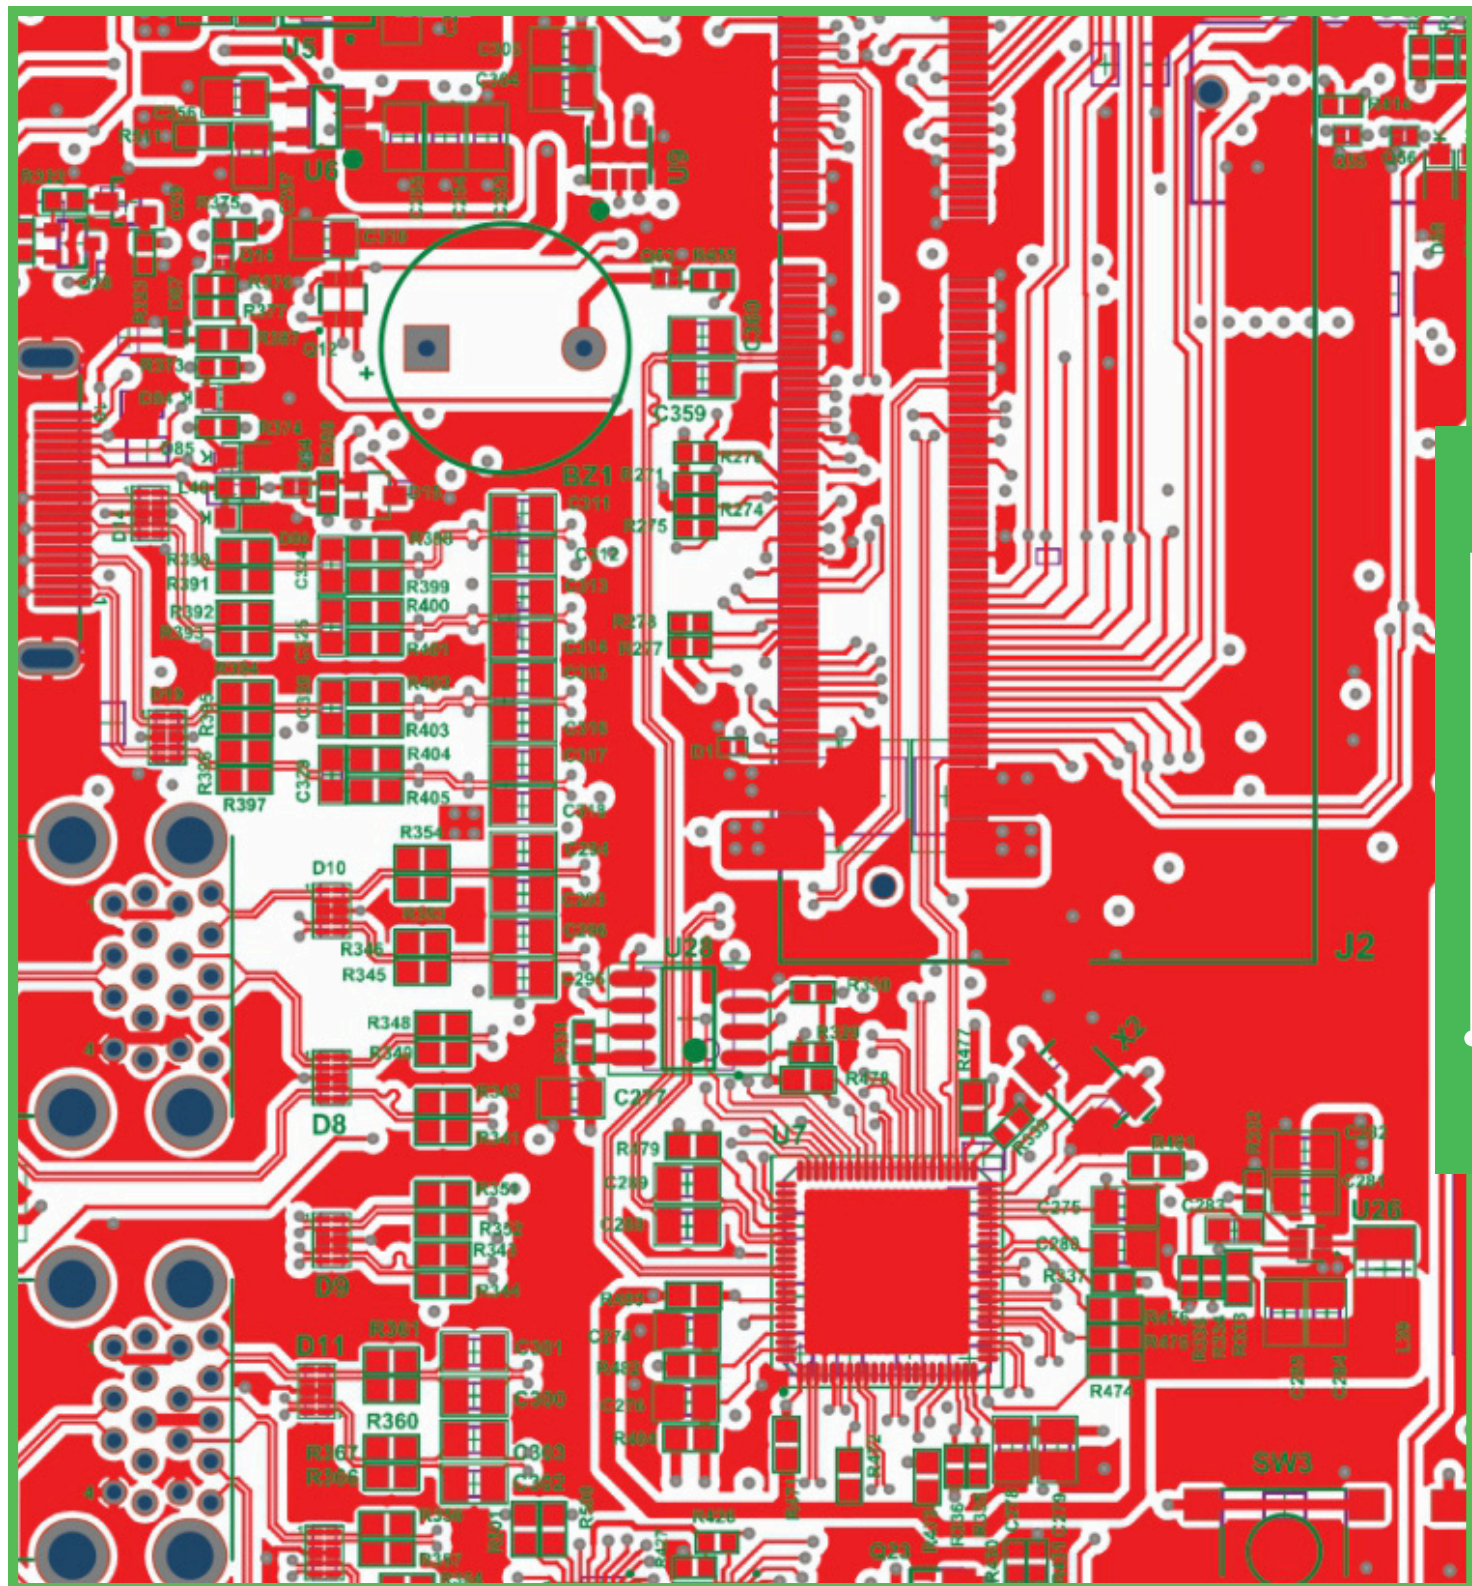

- No Minimum Order Quantity
- Instant Quote (Online Price Calculator)
- Turnkey Service Provider
- Free Delivery & No Setup Charges

Our Accreditations

We follow IPC Class 2 Standards, our facility is ISO certified, our Raw materials are UL certified and we are ISRO verified as well.

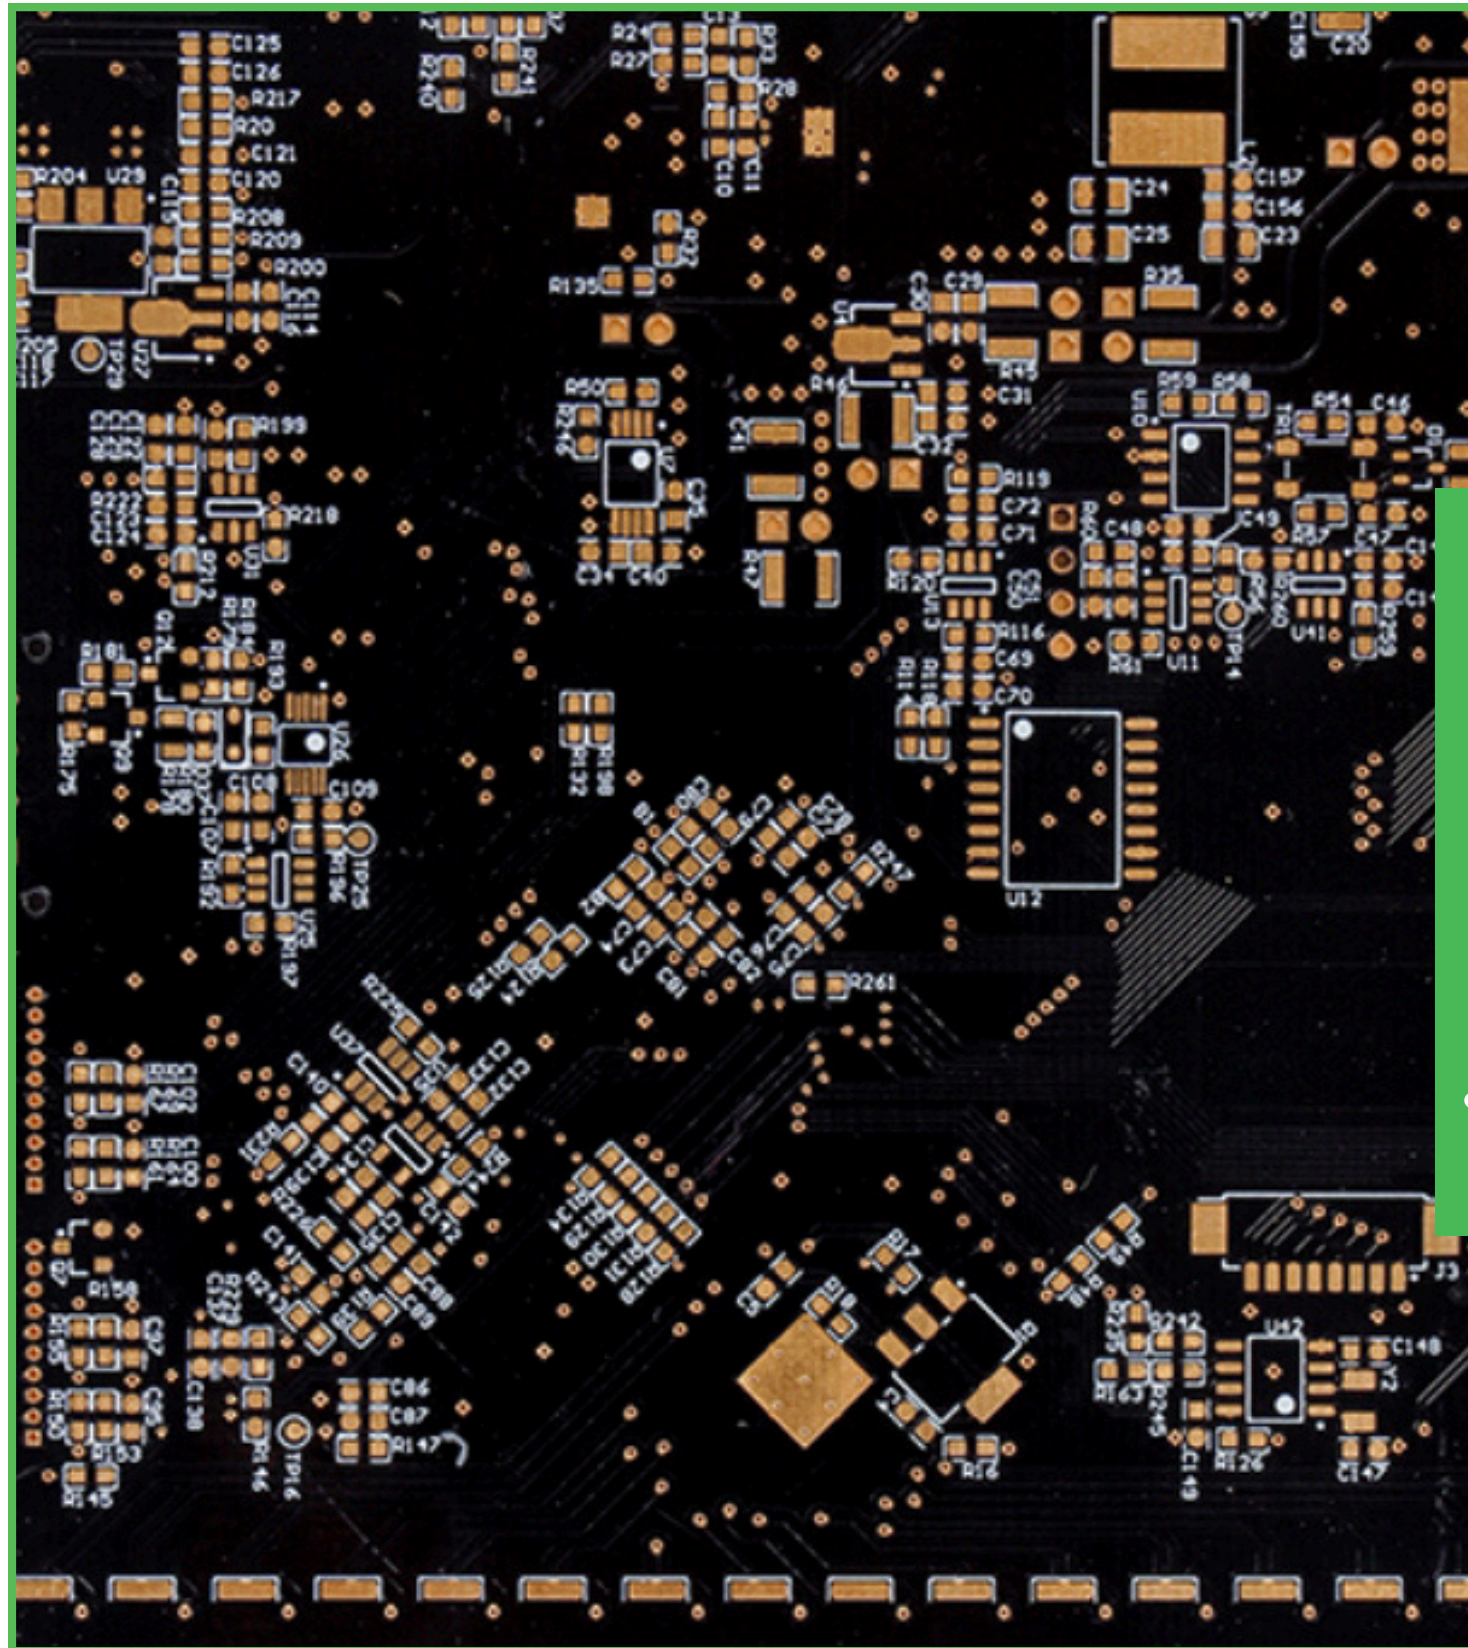

PCB Layout

We transform your design concepts into manufacturable PCB layouts, ensuring optimal functionality, performance, and alignment with your production goals.

We provide -

- Gerber Data
- Drilled Data
- Fabrication Drawings
- Assembly Drawings
- Stencil Data
- Design Database
- PCB Images in 2D
- Customized Output Files

PCB Fabrication (Rigid)

PCB fabrication is the process of manufacturing a physical circuit board from a design file.. We meticulously manufacture circuit boards in line with your design which works precisely on your desired parameters.

We provide -

- Prototype to volume production
- Single-layer to multi-layer rigid PCBs
- FR4, high-TG, metal-core, and other material options
- Quick turnaround with no minimum order quantity

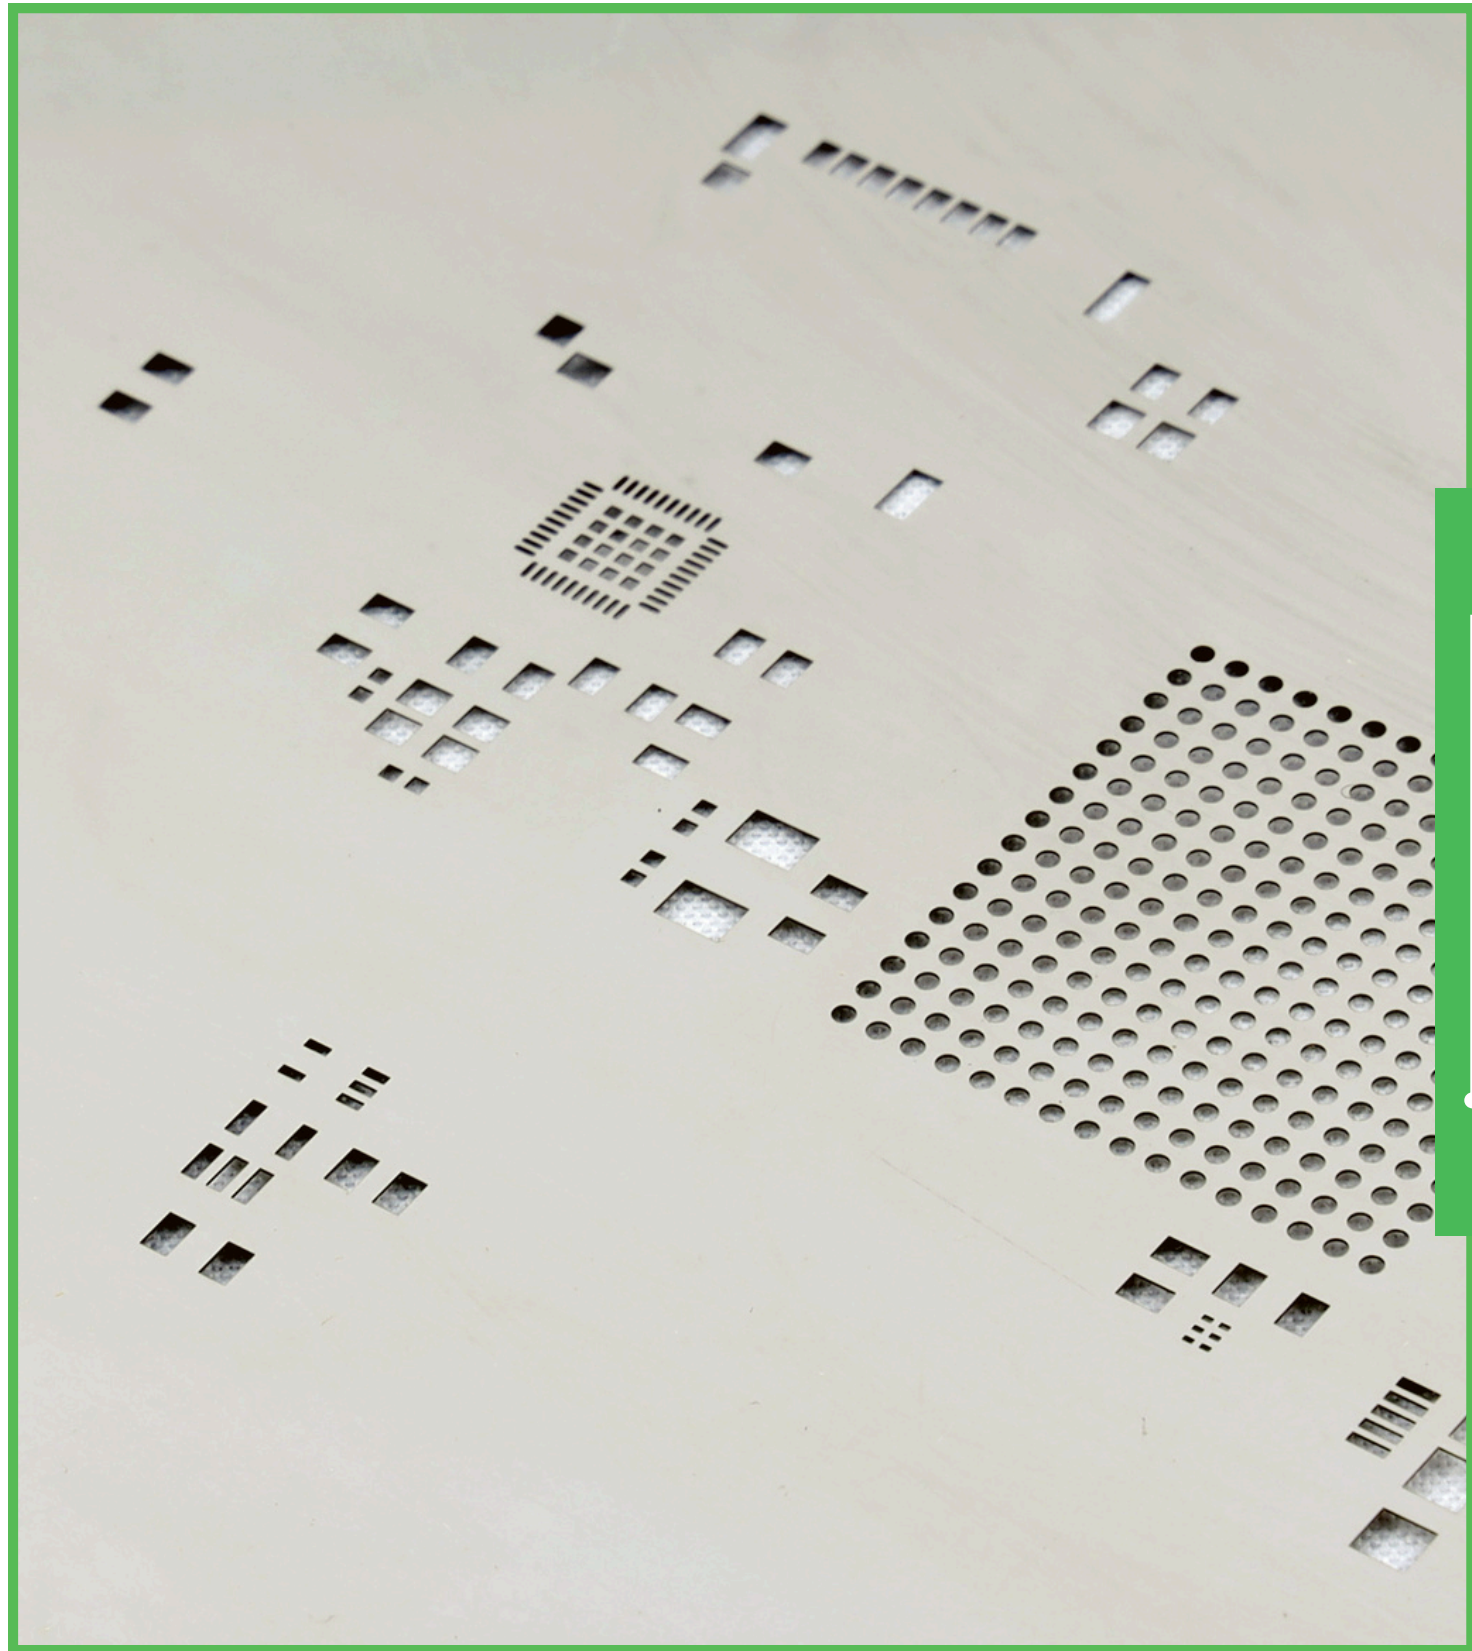

PCB Fabrication (Flex)

Flex PCBs give you absolute freedom to define the form and functionalities of your PCB. Our manufacturing expertise, precision engineering practices, and high-end quality assurance processes ensures that you get the flex PCBs you need.

We provide -

- Single-layer and double-layer flexible PCBs
- Polyimide like high-performance materials
- Laser-cut precision and controlled impedance
- Ideal for compact and dynamic applications

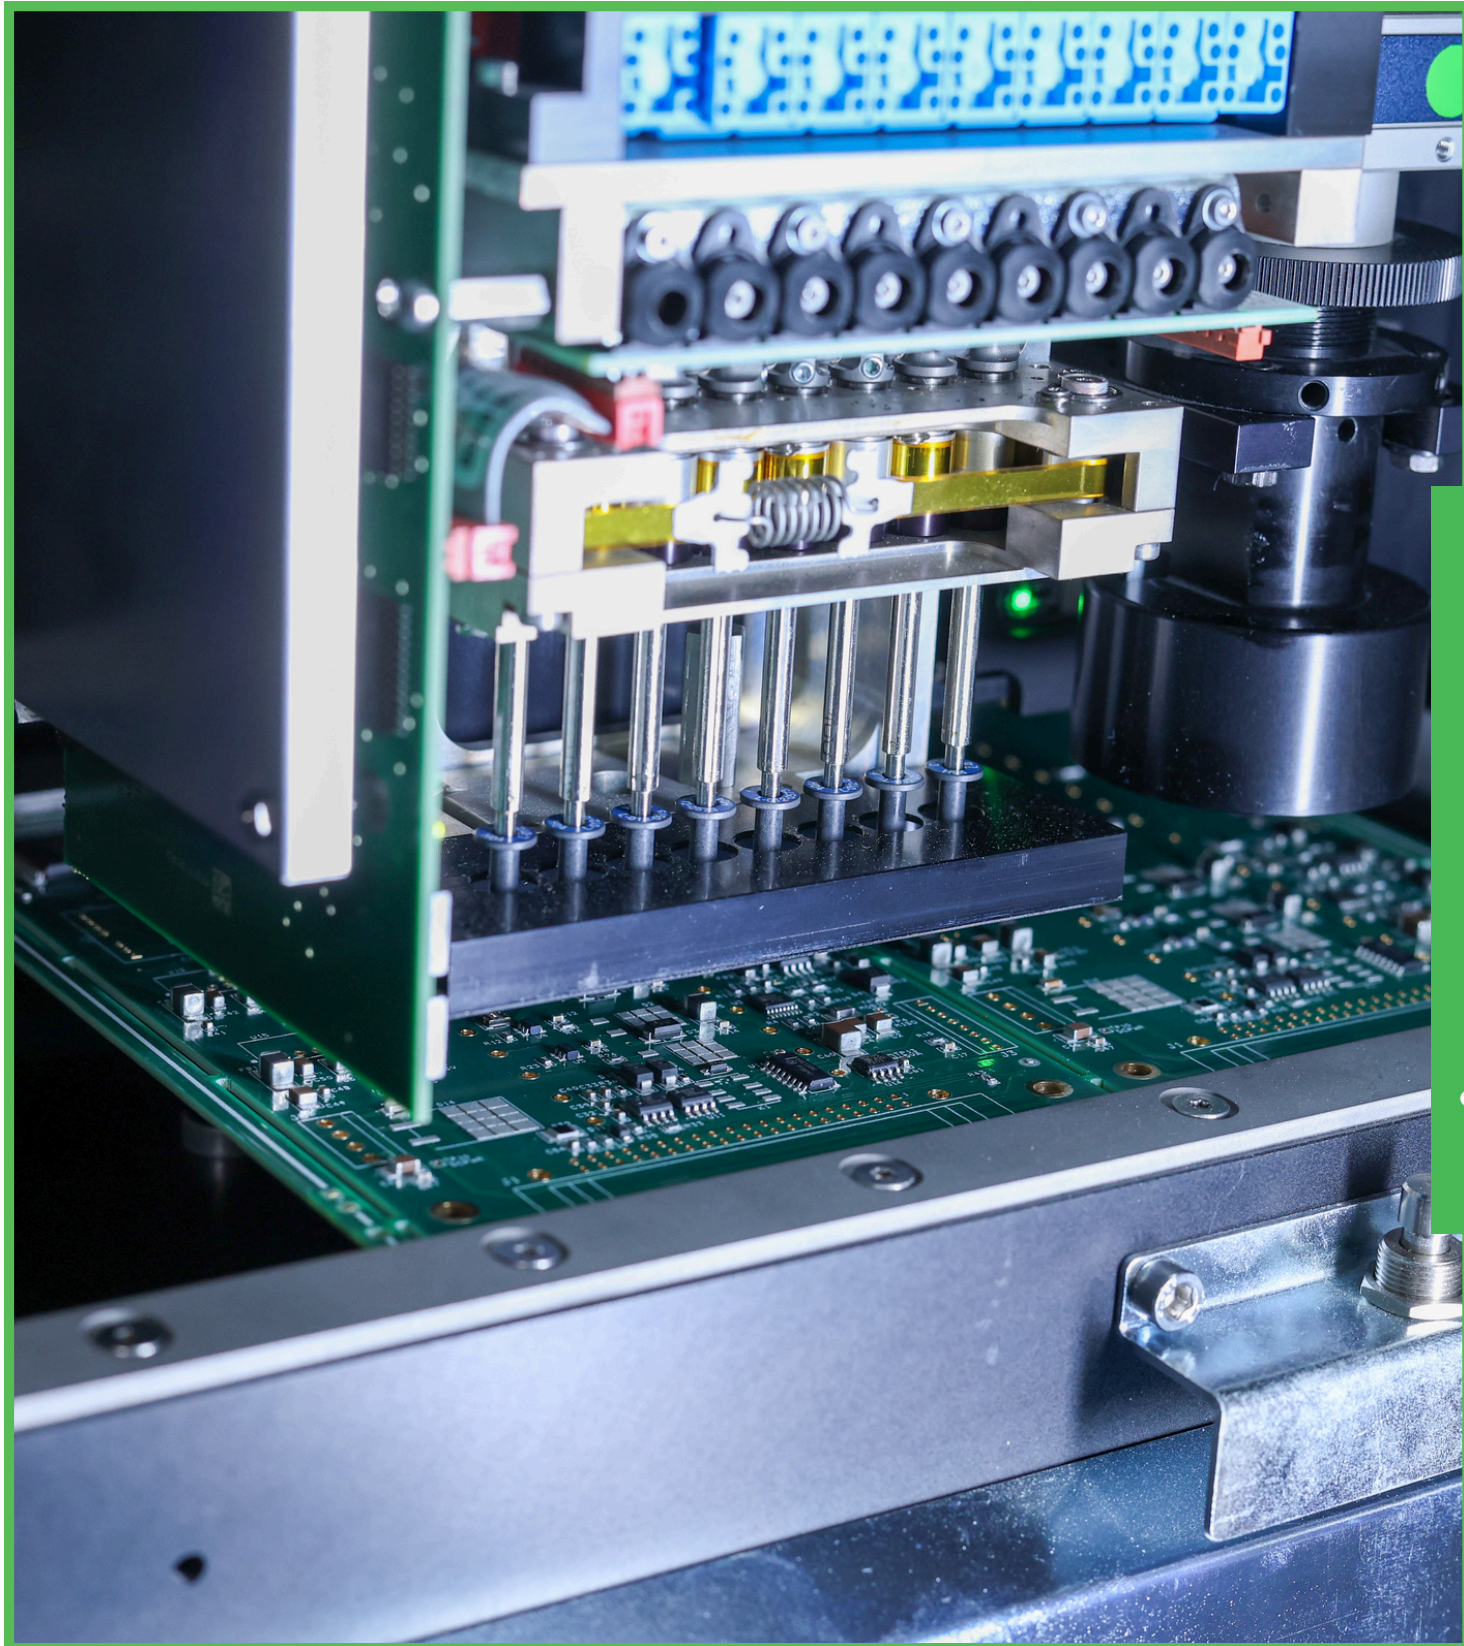

PCB Stencil

Stencils are built to precision as tangible guides that direct the exact circuit design and spatial planning of the circuit mounted devices, during the manufacturing stage to minimize execution errors. Our stencils will help you optimize lead times and production costs, without compromising on the component placement precision.

We provide -

- Laser-cut stainless steel stencils
- Framed and frameless stencil options
- Custom aperture sizes for optimal paste release
- Stencils for prototypes and high-volume runs
- Fast delivery with high precision

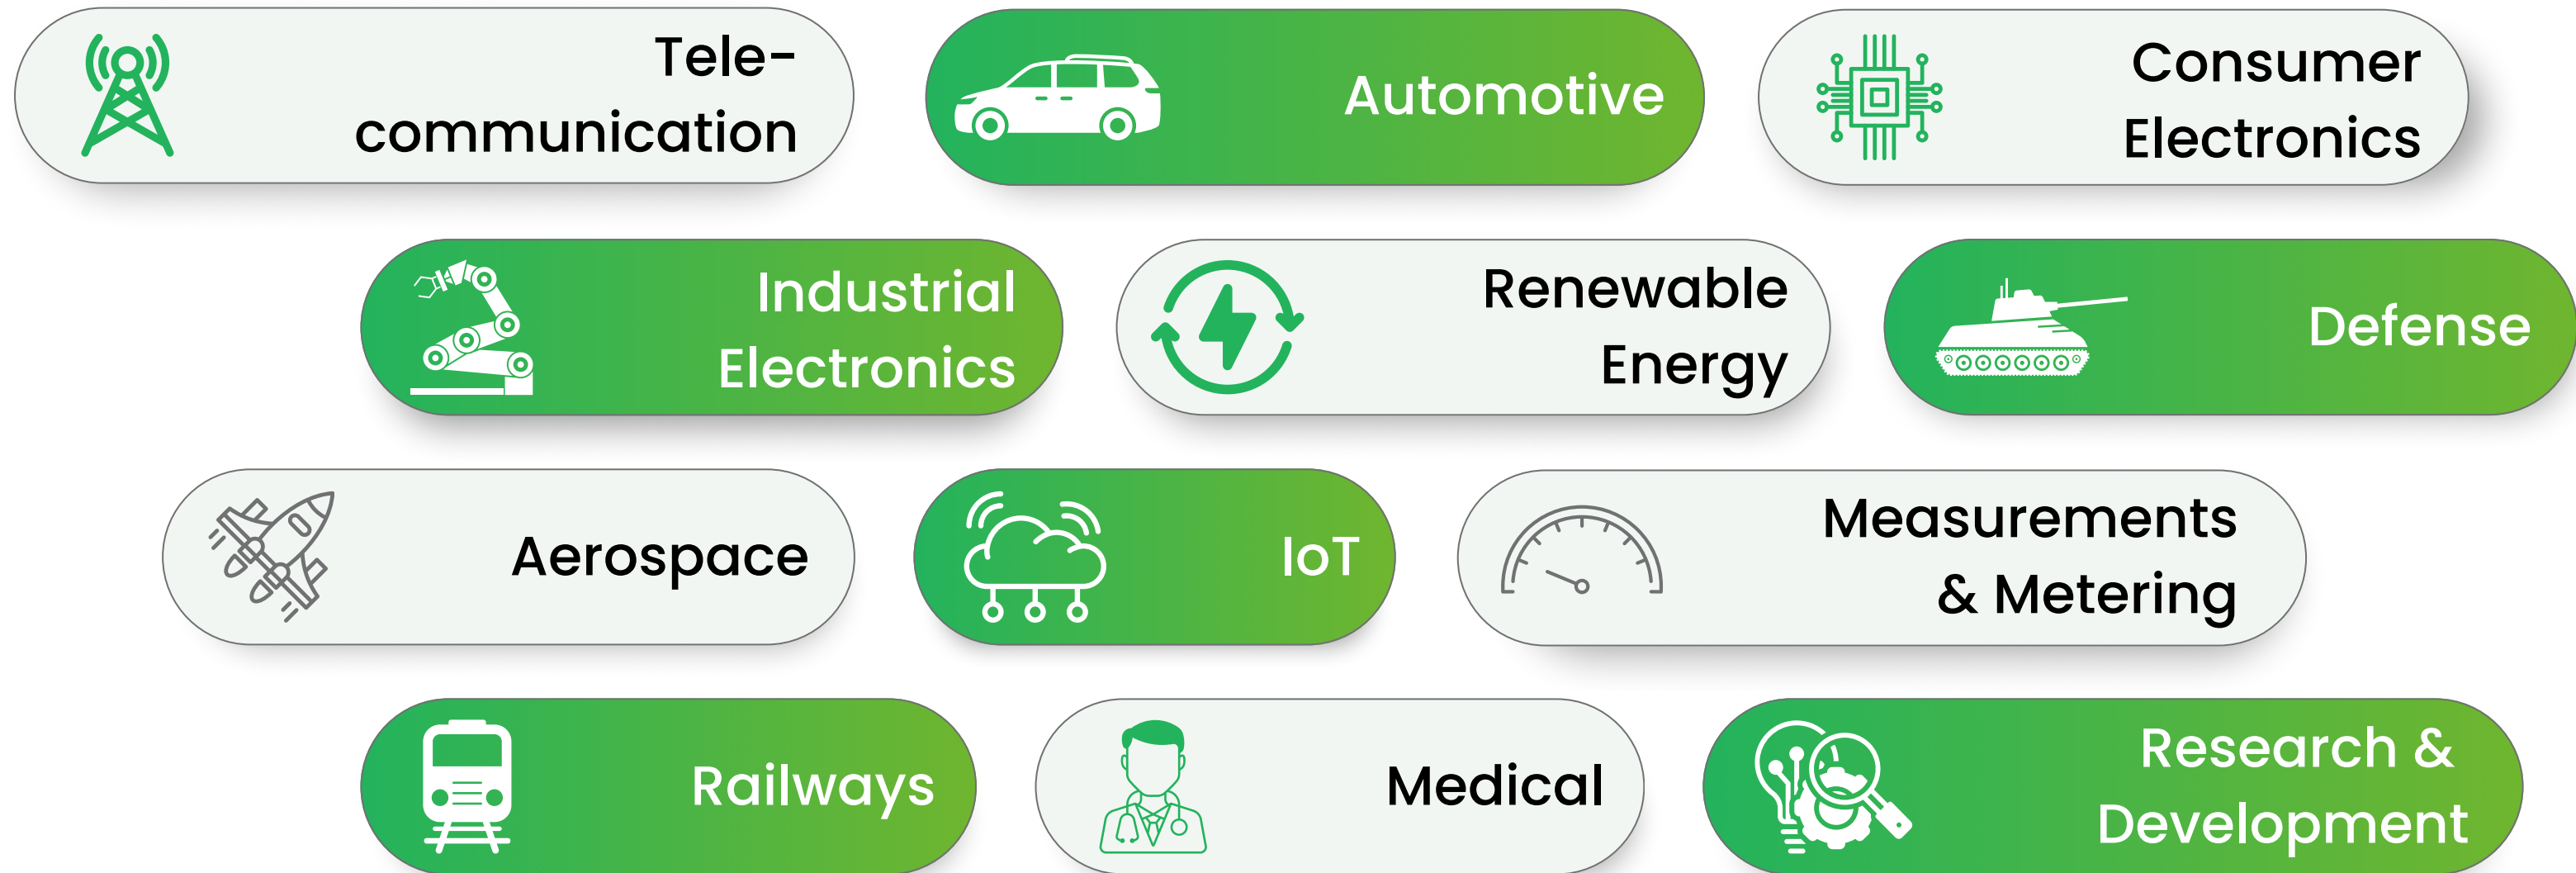

PCB Assembly

The process entails placement, soldering, insertion of components on bare boards. Our perfected Assembly process includes rigorous methods, balancing automation and manual precision along with deep inspection.

We provide -

- Turnkey, Consigned, and Combo Services
- SMT, THT, and mixed technology assembly
- Standardized Systems BGA, QFN, QFP, and 0402 01005
- Components-Capable Assembly Plant
- Functional and visual inspection, AOI/X-ray

Sectors We Empower

Signify

4.5 ★★★★★

We have been a customer of PCB Power since last 4 years and it is our go-to solution for any kind of PCB manufacturing that we require for prototypes.

WHITE LION .PVT. LTD

4.3 ★★★★★

As a 3 year client of PCB Power, I appreciate their excellent service, quality products, and timely delivery. Their attentive team and responsive support, and we look forward to our continued partnership.

THANK YOU
